PROFILE

Software Engineering graduate student with a Computer Engineering foundation and hands-on experience building AI-assisted security tools, full-stack web applications, and network-aware software. Strong in Python, Java, C/C++, JavaScript, React, Node.js, AWS, and applied machine learning; recognized for analytical problem solving, ownership, and translating technical requirements into working products.

EDUCATION

San Jose State University — San Jose, CAJan 2024 — Present
M.S., Software Engineering • Charles W. Davidson College of Engineering

San Jose State University — San Jose, CA
B.S., Computer Engineering • Charles W. Davidson College of EngineeringAug 2020 — Dec 2024

Relevant coursework: Software Systems Engineering, Information Security, Network Security, Software Security Technologies, Database Systems, Mobile Software Engineering

SELECTED PROJECT EXPERIENCE

Phishing Detection System — SJSU
Fall 2025

Python • scikit-learn • Isolation Forest • LM Studio • Tkinter

- Built a phishing-detection application analyzing **517K Enron emails** with heuristic scoring and Isolation Forest anomaly detection.
- Integrated a locally hosted LLM and Tkinter interface to produce hybrid risk scores and human-readable explanations for uploaded email datasets.

AI-Assisted C/C++ Vulnerability Analyzer — SJSU
Spring 2025

C/C++ • Local LLM • Software Security

- Developed an AI-assisted analyzer for memory-safety issues including buffer overflows and race-condition patterns in C/C++ source code.
- Generated diagnostic steps and prioritized remediation guidance with local LLM prompts, validating the workflow across multiple open-source samples.

Restaurant Booking Web Application — SJSU
Spring 2025

React • Node.js • Express.js • Vite • REST APIs

- Developed and deployed an OpenTable-style reservation system with role-based workflows for customers, business owners, and administrators.
- Built REST APIs and React interfaces for search, reservations, and restaurant management; optimized Vite builds and component structure to improve page-load time by **~30%**.

LEADERSHIP EXPERIENCE

Activities Coordinator — Chinese Campus Fellowship, SJSU
Aug 2025 — Present

- Coordinate cross-organization cultural and community events, owning promotion, program planning, rehearsal schedules, logistics, and on-stage execution.
- Organize social events including billiards and bowling nights to strengthen participation and community engagement.

TECHNICAL SKILLS

Languages	Python, Java, C/C++, JavaScript, HTML, SQL, Verilog, PHP
Frameworks / Platforms	React, Vite, FastAPI, Node.js, Express.js, Firebase, Cloudinary, MySQL, MongoDB
Tools / Systems	AWS, Docker, Git/GitHub, Xcode, Android Studio, VS Code, LM Studio, Linux/Ubuntu, iOS, Android
Languages Spoken	Cantonese, Mandarin, English
